

# COMPANY PROFILE

Take Your Project to New Heights of Excellence...

DESIGN | ENGINEERING | FABRICATION | MANUFACTURING | INSTALLATION

## ABOUT US

Vajra is committed to delivering the highest standard of curtain walling companies with diversified products and services and giving our clients access to the widest spectrum of technologies and materials. It has been a key player in the industry since 2008. We were in at the beginning of 21st Century with Kozhikode's Infrastructure development., for producing premium quality Aluminium glazed curtain walling. Our rapid expansion across the States, mirrors the success of our Company and we eagerly await a new decade of challenge and service. Our accomplishments to date include projects such as the P1, P2, P3, P4

Founded in 2008 as an aluminium doors & windows manufacturer, VAJRA underwent a concerted diversification programme in the end of same year that resulted in the creation of a group of integrated operating divisions offering a comprehensive range of construction & industrial products. These products/services are licensed with the leading European & American brands and with Consultants across the States.

VAJRA is in a position to provide innovative custom-designed quality solutions to all your architectural Metal Work. This is made possible due to VAJRA's large sheet metal workshop, high quality finishing, a very well equipped welding bay with TIG and MIG welding machines and highly trained and skilled workforce. Vajra employees have a wealth of experience and a high level of technical experience that ensure its delivery of products to the highest standards.

With its' wealth of experience and technical expertise VAJRA is positioned as a forefront company capable of executing major curtain walling projects to the highest international standards. Our operational Overview and Capabilities are summarised below:

### Our capabilities at a glance

- Sliding and casement windows and doors
- Conventional / structurally glazed curtain wall
- Skylights
- Architectural metal cladding (aluminium composite panel / stainless steel / aluminium sheet)
- Aluminium screens and partitions
- Stainless steel point fix glazing
- Stainless Steel / steel tension rod structure
- Glazed balustrades and hand railings
- Architectural Metal work

VINOD P.M  
Managing Director

## OPERATIONAL OVERVIEW

Vajra's technical offering includes a design team of architects and engineers whose depth experience and technical knowledge allow them to design solutions that are creative cost efficient and of high quality. Our technical and design staff who operate over Computer Aided Design (CAD) stations ensure our clients receive tailor made solutions with the highest level of value engineering.

Vajra's outsourced plant is equipped with technically advanced and computer aided machinery that are operated by well trained and highly skilled staff.

Experienced factory managers and supervisors ensure exacting standards are met and that production targets are met. All procedures follow guidelines set out in our company quality assurance manual which is in line with ISO9001 requirements.

Vajra manages its projects through its project management team that are headed by well experienced Project Directors and Project Managers. Furthermore, each project management team is comprised with support staff including engineers, co-ordinators, QS's, QA/QC, Staff Engineers, site supervisors, etc. that ensure proper project planning and delivery.

# CAPABILITIES

## GENERAL

Vajra offers a full range of aluminum entrance doors, storefronts, windows walls, curtain walls and slope glazing systems. As an industry leader for over 34 years, Vajra has earned a well-respected name in today's building trade. The quality, performance and aesthetic beauty of our products permits architects to fully utilize the unique structural properties of aluminum for both interior and exterior design

## ENGINEERING

Vajra's engineering staff constantly updates product design to satisfy the aesthetic values, structural integrity, performance requirements and economic concerns of today's most demanding projects. Assistance is available for the architect and consultant during the material specification selection and detailing phase a project. All manufacturing drawings are prepared by using the latest Computer Aided Design (CAD) packages

## PRODUCTION

Producing competitively priced high quality products on time for customers is our top priority. To accomplish this goal, we strategically located & outsourced two production facilities. The production plants are equipped with "state-of-the-art" machinery plus metal working equipment and manned by highly skilled and experienced fabricators. Vajra has fabricated thousands of windows, doors, curtain wall / entrance and skylight configurations

## PROJECT MANAGEMENT

Utilizing computerized project scheduling software, highly experienced project managers are able to provide contractors and consultants with the information required to maintain "time-line" control of even the most complex projects

## QUALITY CONTROL

VAJRA is committed to delivering all products and services with the highest level of quality and care possible. To ensure this is accomplished, the company is committed to implementing and maintaining an ISO 9001: 2008 Quality Management System.

## PRODUCTS

### Doors & Windows

Expertise with the latest technology.

Windows characterize the appearance and form of projects perhaps more than any other component. Hence, Vajra's aluminium windows range from standard windows to designer windows, and special windows with diagonal contours and fine mouldings in keeping with the original style. A special feature of the material is that aluminium can be shaped with precision, thus enabling your wishes and requirements of the window to be individually fulfilled

## KEY FEATURES :

- Innovative technology.
- System-tested security.
- Wide range of units and opening types.
- Rich variety of colours.
- Optional burglar, fire and bullet resistance.
- Large range of fittings, glazing beads & handles offers scope for creativity.
- Efficient thermal and sound insulation.
- Easy maintenance

## CURTAIN WALLING

System versatility for a competitive edge, combining creativity and high-tech. Curtain Wall is the central unit in the planning and design of building envelopes. Vajra offers a variety of systems, which allow even the most innovative curtain wall concepts to be realized supremely well architecturally: from window curtain wall with a perfect appearance to impressive structural glazing curtain wall. The extensive range of profile systems allows the conceptual design of a wide variety of Curtain Wall. The variety of options within the systems offers architects and developers considerable scope for creativity. And custom solutions, based on proven systems, can of course also be implemented.

### Key benefits:

- Complete profile systems in aluminium and steel
- All Curtain wall types, including twin Curtain wall
- Window units in all opening types
- Passive and active solar shading systems
- Innovative Curtain wall management technology
- State-of-the-art protection against fire and smoke
- Curtain wall constructions in all resistance classes

## CLADDING

(Display with images irrespective of our involvement)

- Aluminium
- Stainless Steel
- Brass
- Solid Panels
- Composite Panels
- Honeycomb Panels
- Perforated Panels

## HAND RAILING

(Display with images irrespective of our involvement)

- Stainless Steel
- Brass
- Aluminium
- Glass Balustrade
- Cast Aluminium Balustrade

## ARCHITECTURAL METAL WORK

(Display with images irrespective of our involvement)

- Aluminium
- Stainless Steel
- Brass
- Decorative Metal Works

## SKYLIGHTS

Skylights are the glass "crowning glory" in the architectural design of building envelopes. They make a prominent visual statement, whilst ensuring light, pleasant rooms. With the variety of systems, a whole host of different skylight geometries can be designed convincingly.

Skylight constructions can be precisely matched to the particular project-specific requirements - without compromises for architects and developers. This applies to conservatory constructions for homes as much as to large glass arcades in modern shopping malls.

Aluminium is a material that offers ideal properties for skylight constructions: it is light, robust and non-flammable, and can be produced in any shape. Aluminium systems can be used to construct skylights in all shapes and sizes and for all purposes.

### KEY FEATURES

- Complete profile systems in aluminium and steel
- Almost all skylight geometries
- Slim profile face widths.
- System-compatible with almost all façade systems
- Large module widths for maximum light penetration
- Wide range of insert units
- Can be combined with passive and active solar shading systems
- Ideal combination of shape and colour
- Innovative façade management technology
- State of the art fire and smoke control technology
- High level of sound and thermal insulation
- Maximum Flexibility
